

# Federal Updates: New Directions & Goals for HHS

**ASK 1st**  
WHAT IS THE BUSINESS PROBLEM YOU WANT TO SOLVE W/ THE DATA?

ONCE THE DATA IS FREE & LIBERATED HOW WILL YOU USE IT?

We're dealing with a few ISSUES

- DEFINITIONS → An we talking about the same thing?
- BIG BUSINESS → Proprietary issues
- PERMISSIONS → Do you have access to that data?

LEAD TO 3 KEY VISION ASPECTS:

- I SUPPORTING INTEROPERABILITY
- II Info blocking REGS & PENALTIES
- III OPEN APPLIC. PROGRAMMING REGS

Ask each agency: Where do you see that you can contribute to this strategy?

- SEVERE MENTAL ILLNESS
- CHILDHOOD OBESITY
- OPIOD CRISIS

HHS 3 KEY STRATEGIC INITIATIVES

- TREATMENT & RECOVERY SYSTEM
- OVERDOSE REVERSING DRUGS
- PUBLIC HEALTH SURVEILLANCE
- RESEARCH - DRUG & CARE
- PAIN MGMT & PREVENTION

2018 is too old!

WE'RE MOVING THE BALL FORWARD EVERY DAY!

ENGAGEMENT at the LOCAL LEVEL

INTEGRATION

KEEP your EYE ...

# OPIOID DEATHS > ALL VIETNAM DEATHS

OPIOD DEATHS LEADING CAUSE OF DEATH IN PEOPLE < 50

of MULTIPLE DATA SETS within HHS

in a way that ADDS VALUE

At HHS we need

- CLARITY of PURPOSE
- TECH. CONNECTIVITY (where not originally built into systems)
- DATA IMPROVEMENT & TRAINING

what do we want to ACHIEVE?

How are we gonna ORGANIZE it?

It's a natural evolution!

I need to think about SOLVING for the USE CASE

Will this help her?

I need more FACE TIME w/ patients and less SURGEON TITLE + data
