

NATIONAL INTEROPERABILITY COLLABORATIVE
26-28 NOV 2018
AVON, CT

MARGO EDMUNDS
and RHEA BOYD

"Can the SOLUTIONS be right if the DATA is BIASED?"

WHOSE DATA do we have?

What kind of CONTROL do people have over their data?

How do we USE DATA?

DATA and SURVEILLANCE:
What are the ETHICS, VALUES, and SOCIAL RELATIONSHIPS around DATA SHARING?

LOOK AT OTHER MODELS like DENMARK

INTEROPERABILITY ALONE WILL NOT SOLVE POVERTY...

THERE ARE DIFFERENT LAYERS OF INTEROPERABILITY...

WHAT IS THE FUTURE of EQUITY and INCLUSION?

HOW DO WE EXERCISE CAUTION?

HOW DO WE HOLD OURSELVES accountable?

CONFRONT WHITE HEGEMONY and SUPREMACY!

WHITE HEGEMONY and SUPREMACY mean that, on average, WHITE BOYS gain upward MOBILITY and greater WEALTH...

...while BLACK BOYS are targeted by police, are disproportionately incarcerated, and are more likely to be poor...

Sometimes, TECHNOLOGY and DATA POLICY lead to DECREASES in funding for POVERTY ERADICATION PROGRAMS...

READ: AUTOMATED INEQUALITY, Virginia Eubanks a book about OVERSAMPLING POOR PEOPLE, MANAGING the POOR to ESCAPE THINKING about POVERTY.

"IT'S MY DATA!"

WE DON'T HAVE THE RIGHT TO OWN THE DATA OF OTHERS. HOW CAN WE USE TOOLS TO HELP PEOPLE MANAGE THEIR DATA?

NOTHING about us WITHOUT us!

HOW DO LARGE DATA INTEGRATION PROJECTS affect PEOPLE?

- INCLUDE PEOPLE in conversations about HOW THEIR DATA will be USED...
- DESIGN for JUSTICE!
- Build systems that are SPECIFICALLY ANTI-RACIST!

THERE IS A HISTORY of HARM!

POVERTY is an EVERYBODY PROBLEM!

WHAT can we DO?

Don't create SYSTEMS that CRIMINALIZE, STIGMATIZE, or MARGINALIZE poor people! ASK QUESTIONS!

MAKE ANTI-RACISM WORK, EQUITY and INCLUSION, and "DO NO HARM" your ORGANIZATIONAL COMMITMENTS.

SHIFT the NARRATIVE to be more INCLUSIVE... it's not a "they" problem!

Build SYSTEMS around INTEROPERABILITY as multi-dimensional approaches to eradicating poverty.

RETHINK WHO THESE SYSTEMS ARE CENTERED AROUND!

"DATA is NOT INHERENTLY BIASED..."

The NEEDS of OUR PATIENTS are DYNAMIC!

The BIAS is in US!

CORRELATION does not mean CAUSATION or PREDICTION...

DATA SHARING: IS IT ALWAYS A POSITIVE?

...but are our SYSTEMS of SERVICE PROVISION DYNAMIC?

...and does our LIFE EXPECTANCY improve with our HEALTH CARE EXPENDITURES?

NO!

...and the US is alone among industrialized countries in this statistic.

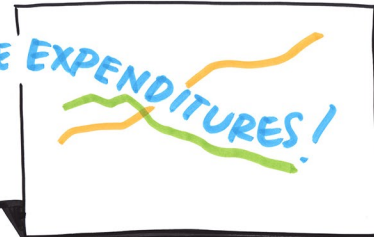

SOCIAL DETERMINANTS OF HEALTH AFFECT LIFE EXPECTANCY DESPITE HEALTH CARE EXPENDITURES!

WEALTH DISPARITY

INTERGENERATIONAL MOBILITY...

ECOSYSTEMS where KIDS LIVE...

SAFETY NETS... "FAMILIES are the safety in the NET..."

HEALTH CARE EXPENDITURES IN THE US DO NOT LEAD TO LONGER LIFE SPANS AND BETTER HEALTH OUTCOMES FOR EVERYBODY!
